## DIRECTIONS FOR ORDERING.

*Time, Annoyance and Expense can be Saved by Noting and Following Closely the Suggestions Below :*

We will understand all orders and inquiries as calling for **Regular Southern Style and Sizes** as described in this catalog, unless specifically ordered otherwise, or unless covered by standing instructions to the contrary.

**Be Explicit** in ordering. Do not assume that we know what you want.

Always give **width** first, length or height second, then thickness.

Always use inches to designate glass sizes, and feet and inches for openings or outside measurements.

### SASH and WINDOW.

The term "Sash" indicates only one piece to fill opening.

The term "Window" indicates two pieces (upper and lower sash).

State size of glass, number of lights, opening (unless regular stock) and thickness. State whether open or glazed, and if glazed whether single or double strength.

If a window whether check or plain rail.

If segment or circle head give number of style desired (see page 40) and radius of circle or segment if not regular. When not otherwise specified we will furnish Circle Head made Style No. 2 with a radius one-half the width of the sash less the width of the stile, and for Segment Head made Style No. 4 with a radius the width of the sash less the width of the stile.

When an odd sash or window is ordered always give both glass size and number of lights and outside opening, and if possible send sketch.

If glass sizes only are given we will understand that regular stock widths of stiles, rails and bars are required.

**Note**—All windows and sash are understood to be glazed unless ordered open specifically. All glazed windows are primed or oiled one coat unless otherwise ordered.

### DOORS

In the absence of other instructions we will consider an order or inquiry for doors to call for the Standard Six Cross Panel No. 200½ O G Door No. 2 quality.

State width, height and thickness, number of panels and arrangement of same and quality.

## DIRECTIONS FOR ORDERING.

---

### DOORS—*Continued.*

State style of sticking unless O G is desired.

If molded state whether flush or raised mold one or two sides.

If oil finish state whether machine smoothed or hand smoothed is desired.

If odd send sketch or detail.

Odd doors will be made with regular stock widths of stiles, rails, muntins and panels unless specifically ordered otherwise.

### OUTSIDE BLINDS.

We will understand all orders for blinds to call for **Regular Southern Stock Styles and Sizes**,  $1\frac{1}{8}$  inch rolling slats unless specifically ordered otherwise.

State size and number of lights of window for which blinds are ordered, also thickness of blind, and whether all rolling slats (R. S.), stationary slats (S. S.), or half rolling and half stationary ( $\frac{1}{2}$  R. S.  $\frac{1}{2}$  S. S.)

If odd give outside opening, thickness, arrangement of slats and send sketch.

The regular stock blind is the width of the window to be covered and one inch longer.

Blinds for brick buildings must be so specified, and will in the absence of additional instructions be made two inches longer than window opening.

A blind indicates a single piece to fill opening.

A pair of blinds indicates two pieces to fold together to fill opening.

A set of blinds indicates more than two pieces, and should always be accompanied by sketch.

### INSIDE BLINDS.

Inside blinds we will understand are to be made four-fold,  $1\frac{1}{8}$  inch thick, outside panel and inside slats; made to be cut in the center unless otherwise stated.

Give exact outside opening always, thickness, number of folds and arrangement of panels or slats (see page 112).

If cut twice or more specify height from top to each cut.

If wanted to fold into box give width of outside folds.

If not the usual arrangement of panels or slats, always send sketch.
